AkzoNobel's International® brand is the world leader in marine, yacht and protective coatings. A long-standing brand synonymous with innovation and collaboration, it is the preferred choice of industry leaders looking for excellence and expertise.

We deliver anticorrosive and fire protection, fouling control technologies and aesthetic solutions for onshore and offshore. Supported by high quality customer service and in-field support around the globe, our technologically advanced **International®** product range strives to satisfy our customers' needs now and in the future.

International® Propelled by curiosity

Alfa Engineering is a worldwide-recognized leading manufacturer of excellent quality Monolithic Isolation Joints for the Petrochemical & Gas industries since over 30 years. Based in the north of Italy, we are proud to deliver the Italian Excellence of Isolation Joints all over the world, in over 40 countries. Wherever you find pipeline, gas distribution system or water pipelines, you will also find a wide array of reliable ALFA Engineering Products (Isolation Joints, Anchor Flanges, Flanges, etc.).

Monolithic Isolation Joints are a fundamental component to be considered by engineering departments while designing pipelines and Cathodic Protection systems to address Failure Risk Mitigation against corrosion.

Alfa Engineering is ISO 9001-2008/15 and PED-CE Certified.

At **Bioclear** Microbial Analysis we strive to make microorganisms and microbial processes more visible and manageable for our clients. To this end, we perform analyses for quantification and identification of microorganisms and microbial activities.

Do you want an independent partner for microbiologically influenced corrosion (MIC) issues? With our MIC analysis strategy, different microorganisms and biofunctions involved in biocorrosion processes are identified, detected and quantified, giving you insight into problems or possible risks in your system.

We can support you with tailor-made advice on prevention, monitoring, and control of MIC for your specific situation.

IVS Industrial Valves Summit is the international event dedicated to the industrial valves and flow control solutions supply chain involving international quality producers of valves, actuators, sealing systems, flow control solutions, mechanical works, surface treatments, forging, casting, etc.

Last edition (2017) highlights:

- 205 exhibitors
- 7.920 qualified visitors: End users, Epc Companies, engineers, technicians, experts from the Oil & Gas sector from 55 different countries.
- 350 commercial and technical delegates
- 10.000 square meters exhibition space

IVS 2019 is willing to host the leading companies in the industrial valves and flow control solutions sectors, providing the opportunity to see the most innovative technological solutions.

Mannesmann Stainless Tubes is a leading manufacturer of seamless stainless steel and Ni-based alloy tubes and pipes with worldwide activities and international production network. With plants and sales offices all around the globe, we link our production and sales processes internationally with highest quality and service. Our company has one of the largest tubular products portfolio in this sector and a 125 years long history that dates back to the innovative technology of seamless tubes manufacture by Mannesmann in the late 19th Century.

Our customers can take advantage from a wide panel of material grades – incl. austenitic stainless, duplex and super-duplex steels and nickel-based alloys – combined with an extensive range of sizes – 6 mm to 280 mm OD with wall thicknesses from 0.5 mm to 50 mm. Our Tubes and Pipes are used extensively in the Oil&Gas (E&P, Upstream, Midstream, Downstream), Chemical, Petrochemical, Power generation (incl. Nuclear as well as Conventional), fertilisers, automotive industries to name a few.

Sandvik is a high-technology, engineering group with advanced products and a world-leading position within selected areas.

Worldwide business activities are conducted through representation in >130 countries. The Group has about 5,500 active patents.

Sandvik Family of duplex stainless steels is highly corrosion resistant especially when it comes to chloride-induced stress corrosion cracking and erosion corrosion. The newest offering in **Sandvik** duplex evolution is **Sandvik SAF 2707 HD®**. A hyper-duplex material developed for critical applications in oil refineries and other process industries. Due to its excellent corrosion resistance, **Sandvik SAF 2707 HD®** is consistently outperforming most other materials in severe chloride containing environments, such as seawater-cooled heat exchangers.

It can serve as a very competitive alternative to expensive nickel alloys and high-alloy austenitic stainless steels in the most demanding applications.
