Association for Materials Protection & Performance www.ampp.org stuart.bond@ampp.org	AMPP, the Association for Materials Protection and Performance, is a global community of professionals dedicated to materials protection through the advancement of corrosion control and protective coatings practices, technologies, and workforce expertise. Ensuring the maximum performance, integrity, safety, and durability of the infrastructure and assets our society depends on is the shared purpose behind the work of AMPP members worldwide. AMPP was established in 2021 following a merger between NACE International and SSPC: The Society for Protective Coatings. The new association unites 145 years of corrosion control and protective coatings expertise and service to industry and members worldwide. Today, AMPP is the world's largest corrosion control and protective coatings organization, serving more than 35,000 members in over 140 countries. AMPP is headquartered in the United States and has offices in Houston, Texas, and Pittsburgh, Pennsylvania. Additional offices are in the United Kingdom, China, Malaysia, Brazil, and Saudi Arabia, with training centers in Houston and Dubai.	Module 7 - Stands 18-19	CONFERENCE ORGANIZERS

Tel. +1 315-393-4450
techsale@defelsko.com
www.defelsko.com

DeFelsko proudly manufactures PosiTector and PosiTest brand of inspection instruments including the award winning PosiTector series of interchangeable probes for measuring coating thickness, surface profile, environmental conditions, salt contamination, hardness, gloss, and wall thickness.

Products include the PosiTector 6000 series of coating thickness gages, the PosiTest AT Adhesion Tester for measuring the adhesion of coatings, the PosiTector DPM L Dew Point Meter Logger for measuring environmental conditions, and the PosiTest HHD High voltage Holiday Detector.

The PosiTector DPM L Dew Point Meter Logger magnetically attaches to steel structures to autonomously measure and record relative humidity, air temperature, surface temperature, dew point temperature, and the difference between the dew point and surface temperatures.

The PosiTest HHD High voltage Holiday Detector offers unique features not commonly found in most holiday detectors including a built-in certified voltmeter and an optional hand-held wand accessory to convert the unit from a stick-type to a wand style detector. The American made PosiTest HHD uses pulse DC technology for detecting holidays in D107coatings up to 20 mm (780 mils) thick. Use with a wide range of **DeFelsko** or competitive electrodes.

iis@iis.it

The Italian Institute of Welding Group (IIS) is constituted by the Italian Institute of Welding - a non-profit Association - and two limited companies: IIS CERT and IIS SERVICE solely owned by the Italian Institute of Welding. The IIS Group is characterized by a multidisciplinary and versatile structure, consisting of operating divisions specialized in different areas of expertise, offering comprehensive services in many industries, such as oil & gas, civil and industrial infrastructures, power generation, transportation, chemical, electromechanical and manufacturing, in Italy and abroad.

The Italian Institute of Welding operates for its institutional purposes of dissemination of knowledge in the field of welding and incorporates staff functions for the entire Group. IIS aims at "promoting and encouraging in every field the development of welding and allied technologies, contributing to its knowledge and diffusion". For this purpose, **IIS** is strongly committed in information and dissemination activities. Furthermore manages the Laboratory for testing materials and components and is engaged in research funded programs.

Corso Torino, 5/12 16129 Genova Italy Tel: +39 010 5958119 www.imc-quorum.com info@imc-quorum.com IMC Engineering is an independent engineering company specialised in corrosion prevention systems, protective coatings, passive fire protection, cathodic protection, thermal and acoustic insulations. The services are mainly addressed to Marine, Oil&Gas Infrastructures and Mega Yacht industries.

IMC develops its activity focusing the technical and specialized interventions including preparation and revision of specifications and procedures, coating condition survey, inspections, supervision and quality control during new construction and refurbishment, project management, failure analysis, laboratory analysis, arbitrations and disputes, fully supported by a team of a highly qualified coating inspectors, AMPP or FROSIO certified, and certified protective coating specialists.

IMC is the official licensee in Italy for the AMPP Courses.

Via Petronio, 8 34015 Muggia (TS) Italy Tel. +39 040 2398 111 www.jotun.com protective@jotun.it

Jotun is one of the world's leading manufacturers of decorative paints, marine, protective and powder coatings.

The Group has 67 companies, 46 countries and 40 production facilities on all continents, and more than 10000 employees.

Jotun products are available in more than 100 countries through own subsidiaries, joint ventures, agents, branch offices and distributors. The Jotun Group's sales in 2022 was NOK 28 billion.

The Jotun Group is organized into four segments and six geographical regions, and has its head office in Sandefjord, Norway.

Via Alessandro Brambilla, 70/D 27100 Pavia

> infoline@saitsrls.com www.saitsrls.com

SAIT s.n.c., founded in 1981, launched itself on the market with generic excavation works for the laying of pipelines and works of cathodic protection. In 1990, the company broadens its range by entering specific services in the field of cathodic protection, i.e. systems designed to prevent corrosion of underground pipes and other structures subject to corrosion such as aqueducts, underground tanks, district heating, natural gas pipelines, oil pipelines, columns of liquid oxygen, reinforced concrete, tanks.

Over the years, <u>SAIT</u>s.n.c. has trained its staff through specialized courses obtaining 3nd level certifications UNI EN ISO 15257:2017 of cathodic protection according to the law and in 2001 it has obtained the ISO 9001/2000 certification.

In 2009 the company expands its workforce in order to give a better assistance to its clients by integrating qualified staff as metric manufacturers for the installation and calibration of industrial gas correctors. In 2014, the **SAIT** s.n.c. turns into **SAIT** s.r.l.s.

In 2016 SAIT s.r.l.s Inserts the all-inclusive anti-corrosion sector, the corrosion control service for district heating pipes, providing, installing and maintaining Hoc anti-corrosion control units.

In 2022 **SAIT** s.r.l.s. becomes **SAIT** s.r.l., as a company forming part of a holding company.

SIDER TEST is a strategic partner for national and international Companies that operate in the production and processing of metallic materials and want to achieve high levels of quality and efficiency.

Our company was born in 1989 as material testing laboratory for the mechanical industry; in 2002 the laboratory adjusted its quality management system in order to comply with ISO/IEC 17025 the International Standard stating the "General Requirements for the Competence of Testing and Calibration Laboratories".

SIDER TEST carries out several kinds of mechanical, chemical, metallographic, corrosion and non-destructive tests in accordance with accredited methods, failure analysis examinations and metallurgical consultancy activity.

Thanks to its experience about corrosion tests the laboratory obtained several approvals from many important Oil & Gas companies, EPC contractors and equipment manufacturers.

We are innovation, reliability, quality. We are **TESI** and for over 40 years, we have been designing, manufacturing and distributing worldwide products and accessories for the Energy, Oil & Gas, petrochemical and chemical industries, both for onshore and offshore projects. The wide range of solutions we offer today is the result of the synergistic and timely management of our three divisions:

- CORROSION PROTECTION for anticorrosive coatings to preserve infrastructures integrity;
- PIPELINE EQUIPMENT for pipelines construction projects;
- IGNITION SYSTEMS for every combustion process.

Our Corrosion Protection Division produces ENVIRAWRAP and its derivatives for the corrosion protection of inshore and offshore structures in both the splash zone and subsea where corrosion of the steel is a concern. Designed to eliminate the need for primer, fillers and spiral wound tapes, Envirawrap's elastic memory four and six-layer dedicated composite fabrics provides both active and passive corrosion protection when impregnated with corrosion-inhibiting gel.
